Compared to December 31,2021, the SCR fell by € 18.9 million.

For DEVK Rückversicherungs- und Beteiligungs-AG, the largest single risk was market risk and within this category the equity risk, which is dominated by the risk arising from investments in other DEVK companies (volume: approximately € 2,532 million). The unequal distribution of the risk types led to a relatively low diversification effect of € 136.9 million. The catastrophe risk (€ 503.1 million) was the largest single risk within the underwriting risk, mainly as a result of the acquired catastrophe exposure.

No simplifications have been used in accordance with the implementing regulation Solvency II. The company does not apply the volatility adjustment, nor the transitional deduction referred to in article 308b of Directive 2009/138/EC. The company has not certified any undertaking specific parameters (USP) for the calculations.

There are no discernible developments that could lead to a significant impairment of the company's net assets, financial position and results of operations and thus jeopardise its continuing existence.
